Avon has many existing groups of large shade trees along main roads

see text for type of shade trees proposed

Plant Trees Both in-Line and Clusters

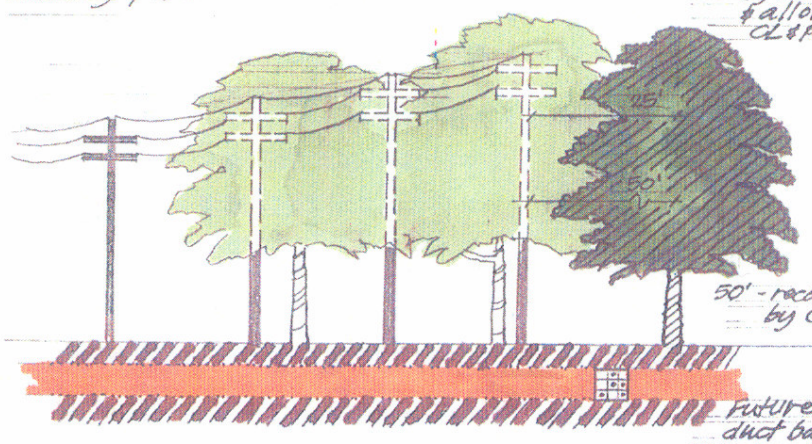
Lighting provides easily identifiable common theme

Large trees will begin to scale back wide-road impact and bring continuity to Center

Shade trees to provide Scale and Relief

Shade trees reduce the visual impact of utility poles

25' - min. proposed by Center Study & allowed by CL&P

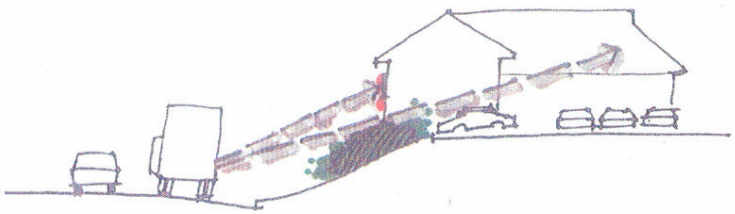


50' - recommended by CL&P

Future: precast duct bank to put underground

Utility Pole Visual Reduction

Cars can be screened without obscuring Buildings and Signs



Screening Parked Cars
