Tel. (860) 409-4310
Fax (860) 677-8428

TDD-HEARING IMPAIRED
Tel. (860) 409-4361

The Town of Avon, Connecticut wishes to express our strong support for renewable energy and energy conservation in the State of Connecticut. The citizens of our community are concerned about our dependence on foreign sources of energy, the effects of green house gas emissions from the burning of fossil fuels and the detrimental economic effects of future energy cost increases.

We applaud the actions taken to preserve funding of Connecticut Clean Energy Fund ("CCEF") and the Load Management/Conservation Fund in the State Budget. Funds for these two critical aspects of a sustainable energy plan for Connecticut are funded by a special combined benefits charge levied to all electrical ratepayers in Connecticut and should never be considered as a part of the general tax revenues of the State.

We also understand that millions of dollars are available from the Federal Stimulus Package for renewable energy initiatives in each state. We support allocating those funds to the two existing funds (CCEF and Loan Management/Conservation Fund) in the same proportion as the current combined public benefits charge collected by the electrical utilities.

The combination of existing funding and the Stimulus Funds should allow the CCEF to expand funding of renewable energy technologies beyond the current solar PV programs. In particular, we would like to see some creative funding available for geothermal, wind and small hydro technologies.

We urge other groups working in the public interest and other municipalities to endorse similar initiatives to those we have mentioned above.

John F. Carlson, Chairman
Avon Town Council
