MEMORANDUM

To: Brandon L. Robertson, Town Manager
From: Margaret Colligan, Director of Finance 
Date: January 31, 2014
Subject: Quarterly Financial Report: Period Ended December 31, 2013

The financial information presented in the accompanying report, Estimated Statement of Revenues, Expenditures and Changes in Fund Balance, for the Fiscal Year ending June 30, 2008, June 30, 2009, June 30, 2010, June 30, 2011, June 30, 2012 and June 30, 2013 are audited. For the quarter ending December 31, 2013, the information is unaudited. This report contains financial statements presented by the Town and the Board of Education through December 31, 2013. The Town report encompasses an overview on all funds revenues and expenditures, with discussion on the Town's operating budget variances.

Included in this quarterly report are the Town's lease agreements, which are in accordance with the operating lease and capital debt policies, approved by the Boards in the spring of 2008. These reports reflect no additions or deletions in the number of agreements from the prior fiscal year but some Town lease agreements have expired with replacement agreements in place. We have requested an updated report on the Board of Education's lease agreements as we have been made aware of a new lease/purchase agreement for the acquisition of computers.

Included in this report is the Executive Summary for the Third Quarter of 2013 for the Town's Defined Benefit Pension Plan and the Town's Retiree Medical Program, all of which are prepared by the Town's Pension Investment Advisor, Fiduciary Investment Advisors, LLC.

Revenues, continued

Licenses, Fees & Permits

- This category in total is at 70% collected versus 97% for 12/13.
- Recording & Conveyance category is at 61% collected, versus 78% collected for 12/13. Buildings, Structures and Equipment revenues are at 81% (reflects partial fees for the Assisted Living Complex to be located at 117 Simsbury Road), versus 127% collected for 12/13 (12/13 includes fee for CREC School and Reflexite applications). December 13/14 activity reported by the Building Division indicates 1 new home construction permit during the month. Fiscal year-to-date new single family dwelling permit activity is at 15 for 13/14 and 16 for 12/13.

Intergovernmental

- This category is reporting at 23% collected for 13/14, versus 24% in 12/13, and is expected to come in at budget. Traditionally, the majority of funding for the grant programs is not received in the first half of the fiscal year.

Charges for Services

- This category is at 27% for 13/14 versus 34% for 12/13. Comparing individual revenue categories collected and reported through December on a fiscal year basis indicates that the Town initiated revenues are tracking on plan as this is an automated process, where revenues are deposited and reported via departmental collection reports from the Collector's office, transmitted and imported directly into the Town's financial system. The Board of Education revenues are collected off site with paper copies submitted to Accounting with account codes and amounts, which may cause some lag time in reporting results to Accounting. These revenue accounts make up 61% of this category appropriation.

Other Local Revenues

- This category is at 24% for 13/14 and at 23% in 12/13 and may fluctuate when comparing year to year due to one-time revenues reflected in some years and not others. This category reflects a \$22,143 CIRMA distribution. The Fed funds range remains unchanged at 0.00 and 0.25 percent (in effect since December 2008).

Appropriations from Unassigned Fund Balance/Estimated Unaudited Fund Balance as a Percentage of General Fund Budgeted Expenditures

- Estimated Unaudited Unassigned Fund Balance as a % of General Fund Budgeted Expenditures:
10.46%
 - Use of UUFB towards a new DPW Trailer in the amount of \$11,442.05 (the intended source will be GFFB Assigned for Capital Asset Replacement).

Fund #01 General Fund

Expenditures within the General Fund are not as cyclical or flexible as Revenues. They maintain a closer percentage tie to the budget on a straight-line approach. Departments track their budget on a monthly basis to assure compliance with the approved budget. Efforts are ongoing throughout the organization to manage and reduce costs. Financial system reports indicate expenditures are at 49% expended. Currently there are no major expenditure variances in the General Fund to report. Transfer forms are required to be processed if an invoice indicates over expenditure at time of payment. Invoice is then returned to originating department. Utilities will be closely monitored with current expenditure activity within expected budgetary range. For Public Works snow and ice control, the Town budgeted salt at \$80/ton; this reflects the estimated ceiling price for 1400 tons of treated salt anticipated for purchase. The contract is due to expire June 30, 2014. As in prior years, Accounting will monitor the budgetary impact of any unplanned emergency expenditures and research for any offset in unanticipated under expenditures.

Expenditure variances in excess of \$10,000 are as follows:

210751013	Patrol Services- Temporary Full Time	(\$11,552)
-----------	--------------------------------------	------------

Over expenditure due to vacant positions in full time staffing. To be covered by intradepartmental transfers.

TABLE of CONTENTS

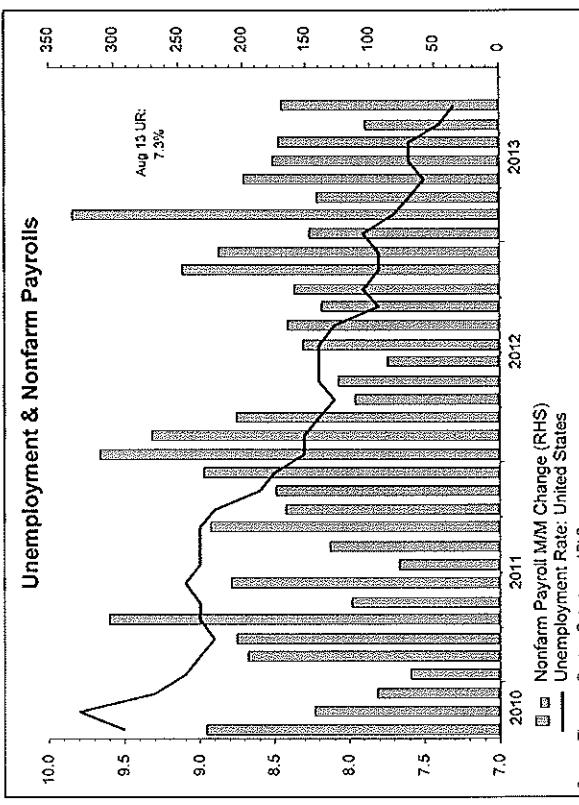

Market & Economic Review

The talk of the Fed tapering its bond buying program played a prominent role in asset class returns during the quarter, culminating with the **Federal Reserve announcement that it would not begin to slow its asset purchase program**. The S&P 500 Index reached a new all-time high on the back of the announcement, however, concerns over the looming sequester in Washington and the possibility of a government shut-down caused markets to sell off at the end of the quarter.

International developed markets led the way, outpacing both U.S. and emerging equity markets during the third quarter. Economic data from the Eurozone continues to trend positively, boosting investor confidence in the region. Meanwhile, fixed income returns continued to lag equities as the ten year treasury bond finished with a yield of 2.64% as compared to the second quarter closing yield of 2.52%.

The U.S. economy continued to grow, as U.S. Real Gross Domestic Product increased at an annualized rate of 2.5% during the second quarter. Manufacturing remains strong, and U.S. consumer net worth reached an all-time high of \$74.8 trillion.

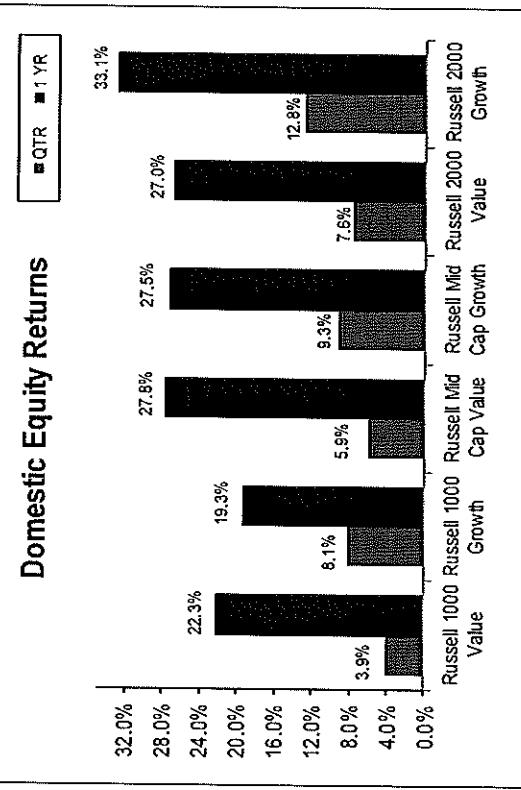

The **unemployment rate in the U.S. fell to 7.3% in August**. Contributing to the reduction was a continuing decline in labor force participation.

Inflation remains muted, with the Consumer Price Index (CPI) increasing 0.1% during August and 1.5% year-over-year. Core CPI (CPI less the more volatile food and energy components) rose 1.8% on a year-over-year basis.

Domestic Equity Review

Stocks enjoyed strong gains in the third quarter, buoyed by hopes for continued monetary stimulus and a rebound in the global economy. Most of the major stock indexes moved further into record territory before pulling back late in the quarter due to investors' concerns about impending budget battles in Washington, which threatened to worsen the fiscal headwinds confronting the economy.

Growth led value across all size segments during the third quarter and is also leading year-to-date. The weaker performance by the interest rate sensitive groups has impacted value-oriented stocks, while outperformance by the consumer discretionary and healthcare sectors have led to the strong gains in growth stocks.

International Equity Review

International Equity Returns

■ QTR ■ 1 YR

International equity markets posted robust returns for the quarter. Equities in Europe were among the strongest performers as improving economic data out of the region bolstered returns. Overall, equities in developed markets outpaced emerging markets.

Value oriented stocks posted better results than growth stocks in international markets. The developed market arena saw smaller cap stocks outpace large caps, while within emerging markets large caps posted superior returns.

Emerging markets rose this quarter but lagged developed markets. Emerging market returns were muted through August but advanced after the announcement in September that the Fed would delay the start of the tapering of its bond buying program. Positive economic data out of China led to equities in the country outperforming.

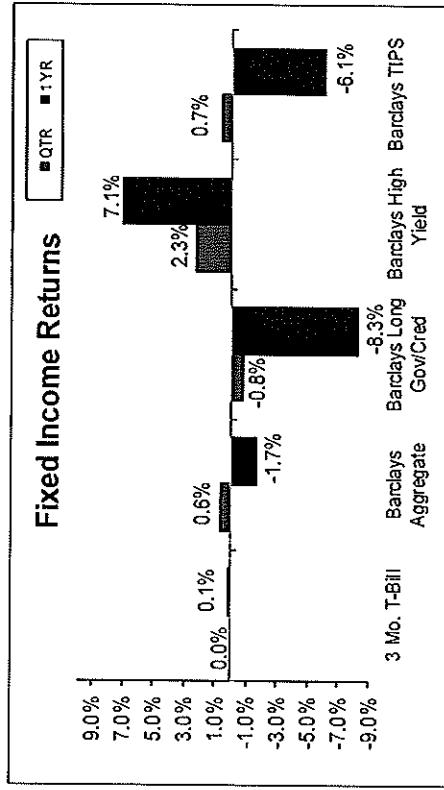

Equities in Japan moved higher for the period, although returns lagged the strong gains in international markets. Gains were achieved despite concerns regarding a sales tax increase, as solid economic data drove investor sentiment.

3Q 2013

MSCI Country Results	Local	USD
United Kingdom	4.9%	12.0%
France	10.8%	15.4%
Germany	8.2%	12.7%
Japan	5.4%	6.7%
China	12.2%	12.2%
India	-0.2%	-5.3%
Brazil	9.2%	8.4%
Russia	12.4%	13.6%

The U.S. dollar was generally weak this quarter versus other developed market currencies. The British pound, Japanese yen, and euro all appreciated versus the U.S. dollar. Emerging market currencies had mixed results, with the Indonesian rupiah falling sharply while the South Korean won appreciated.

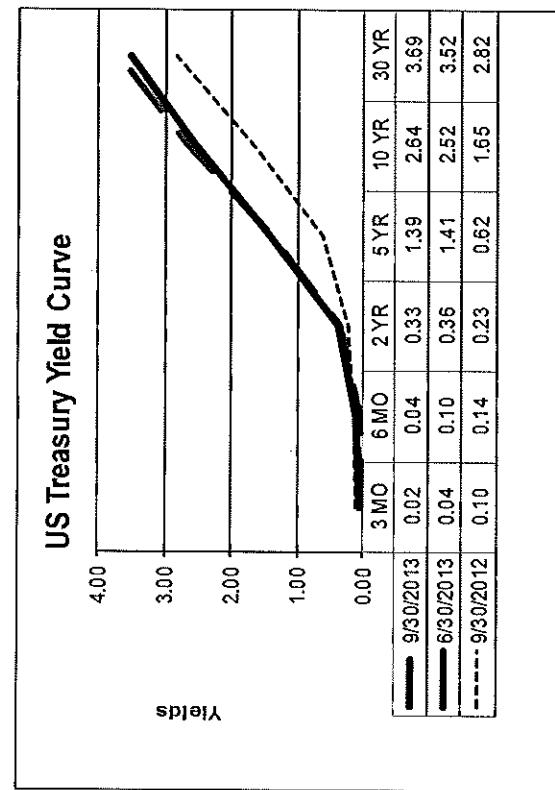

Fixed Income Review

Interest rates trended higher during much of the quarter, as investors began to prepare for the assumed start of Fed tapering. Ultimately, rates fell during the final two weeks of the period after the Fed switched course and ultimately opted not to slow its monthly purchase program.

The short end of the yield curve remained essentially anchored, while longer maturities posted sharp losses due to increased uncertainty regarding the Fed's ongoing technical influence in the Treasury market.

Spreads tightened in the corporate space, with lower quality issues leading the way higher. Financials were the best performing subsector on a duration-adjusted basis. Bank loans also performed well, as increased demand fostered a strong technical environment for floating rate instruments.

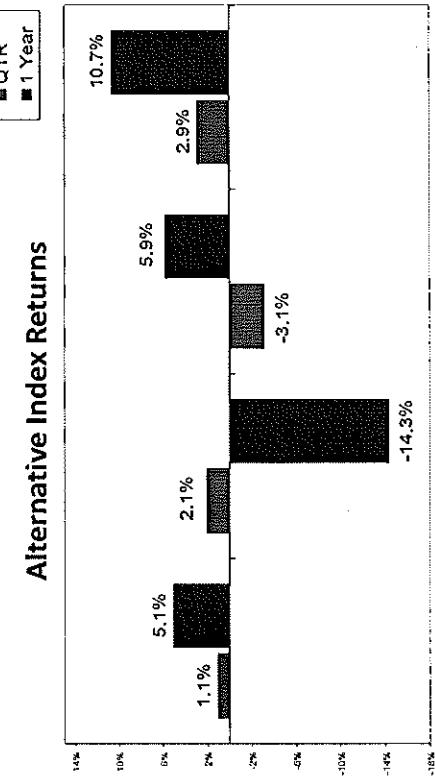

Mortgage securities benefitted from news that the Fed would continue to purchase \$40 billion of MBS securities monthly. Commercial mortgages also performed well, benefiting from an improved environment for risk assets.

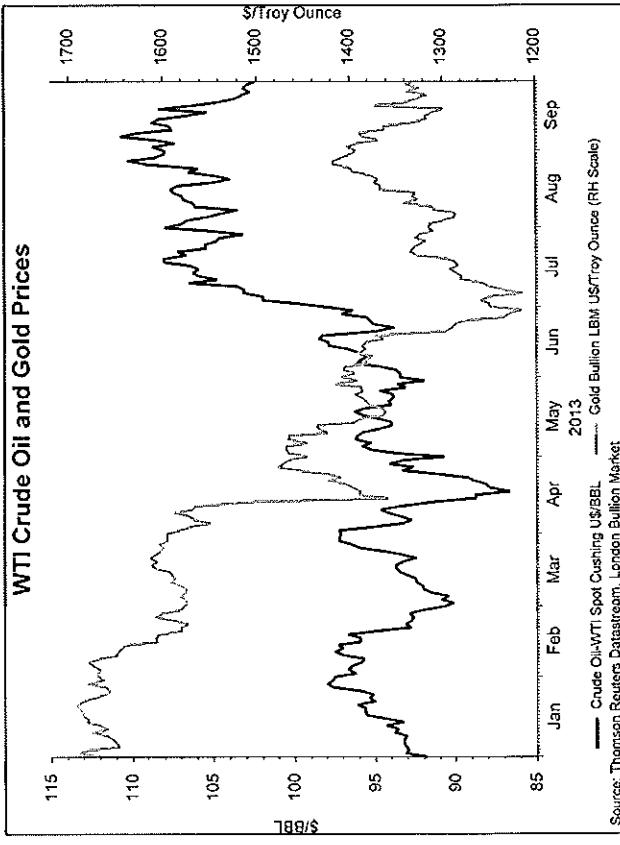

Outside of the U.S., higher yielding developed market sovereigns outpaced safe haven assets as risk taking continued to be supported by central bank policies. Emerging debt produced positive results but was unable to recover second quarter losses.

Alternatives Review

Alternative Index Returns

WTI Crude Oil and Gold Prices

Hedge funds moved higher during the period due to **strong results from equity and event driven managers**. Special situation and activist managers performed particularly well in the event space and have produced returns in excess of 10% calendar year-to-date. Macro/CTA managers continued to struggle during the quarter, producing negative returns in all three months as systematic strategies continued to be hurt by commodity exposure.

Commercial real estate markets continue to benefit from improved operating fundamentals, limited new supply delivery, and investor appetite for yield. Cap rates remain steady, near historically wide spreads to treasury yields, providing continued support for improved property valuations. Activity in the secondary and tertiary markets has accelerated, although demand remains biased toward the primary core markets.

Global property stocks rebounded, driven by **improved economic prospects in Europe and Asia**. Regional results were mixed as U.S. REITs (-3.1%) declined modestly, while Europe (10.1%) and Asia (+7.3%) rallied.

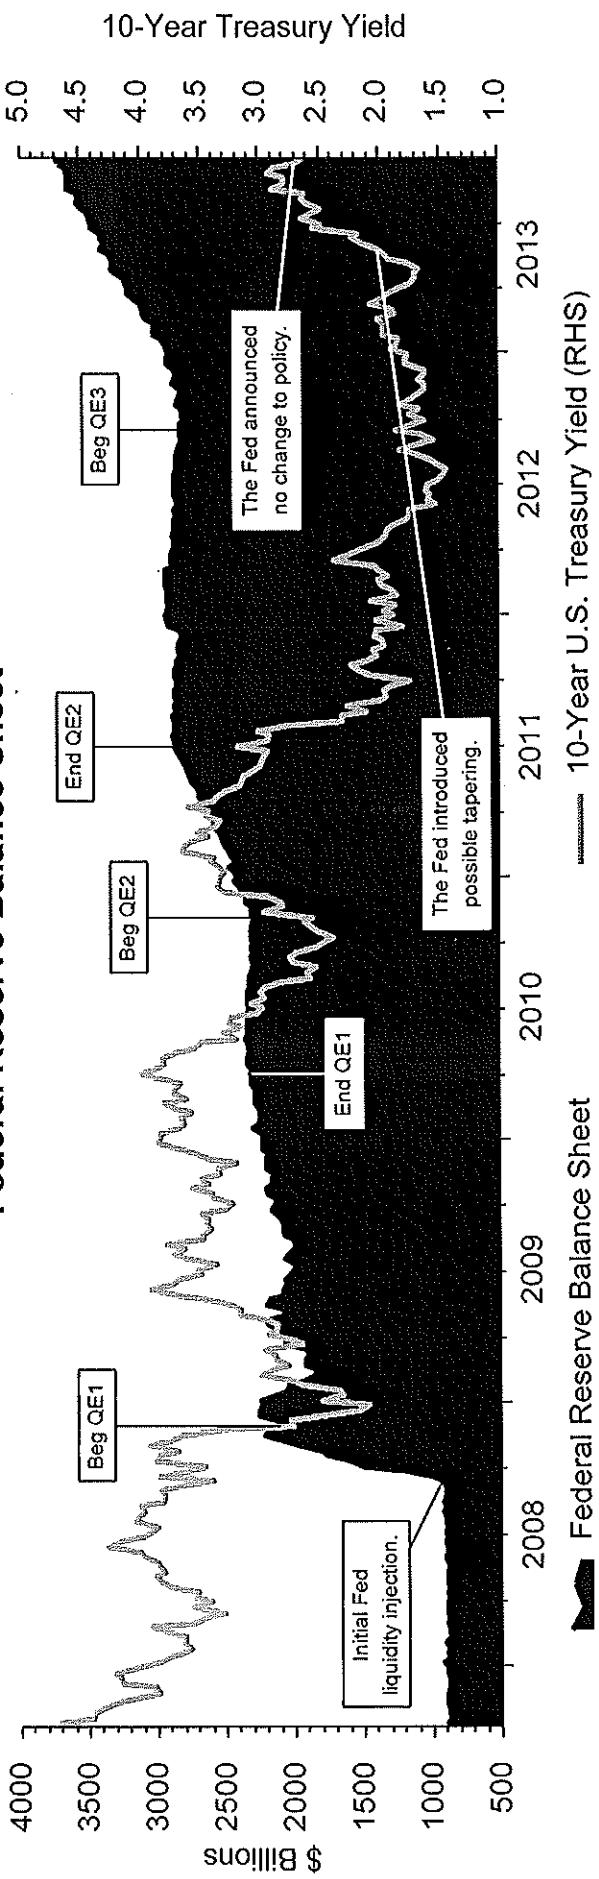

Commodities rebounded in the quarter, with four of five major subsectors posting positive returns. Precious metals posted the strongest results (+9.0%), driven by geopolitical fears in the Middle East and uncertainty surrounding U.S. monetary policy. Industrial metals rallied (+4.3%) on improved economic and demand data from China. Agricultural commodities weakened (-2.6%), as ideal weather conditions drove expectations for record crop yields.

Capital Market Themes

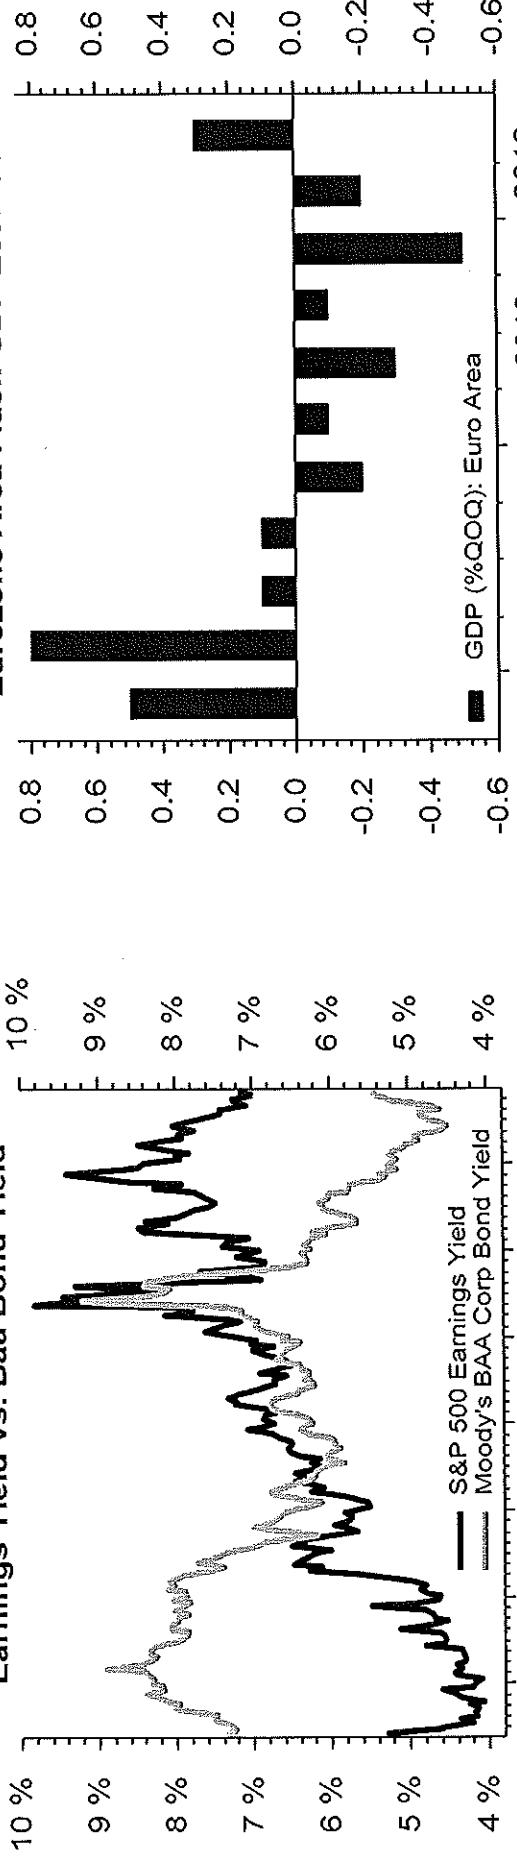

- Investors' thoughts remain squarely focused on central bank activity. Recent attention has been centered on the eventual timing and size of the Fed's tapering of its bond buying program ("QE3"). Risk assets have benefited from accommodative monetary policy but have been apt to consolidate at the hint of any pullback of these policies.
- Continued momentum of equities has pushed valuations higher, although they remain, by and large, at reasonable levels. Compared to fixed income assets, equities remain attractive, and persisting indications of stronger economic data should continue to favor the asset class.
- Looking across developed markets, opportunities within international equities appear more favorable as the economic situation within Europe has seen signs of stabilization.
- The emerging markets have encountered some near-term headwinds, most notably, slowing growth rates and concerns surrounding foreign investment. However, the appealing long-term economic growth profiles and reasonable valuations of the asset class bolster its appeal.
- Our expectations remain skewed toward higher rates longer term. As such, more flexible fixed income mandates may possess attributes that are more appropriate for a rising rate environment.

Fixed Income		
PIMCO:Tot Rtn:Inst (PTTRX)	Maintain	3Q 2013 – The PIMCO Total Return fund outpaced the Barclays Aggregate Index and ranked near the top of its peer group during the third quarter. Interest rate strategies were positive for performance largely due to a focus on the three to five year portion of the curve and an underweight to long maturities. TIPS exposure also contributed to results as breakeven rates widened during the quarter. Performance in spread sectors was led by non-agency mortgages and financials in the corporate space. An overall underweight to investment grade bonds partially offset gains as corporate securities outpaced similar duration Treasury issues. Tactical positions in Japan also weighed on results as yields declined in the region. PIMCO continues to position the portfolio conservatively with a preference for income over price appreciation. PIMCO believes that risk premiums are fair to fully valued relative to their outlook and as a result they remain underweight corporate spread product. Duration exposure is concentrated in the front end of the U.S. yield curve and in countries such as Canada, Brazil, and Mexico.
Vanguard Tot Bd;Sig (VBTSX)	Maintain	3Q 2013 - In accordance with its investment objective, the Fund performed in line with the Barclays Capital Aggregate Bond Index.
BlackRock:Str Inc Opp:J (BSIX)	Maintain	3Q 2013 – The BlackRock Strategic Income Opportunities Fund produced positive absolute results and outpaced broad fixed income markets during the third quarter. The Fund benefited from a broad range of investment strategies led by investment grade credit positions in the U.S. and Europe. Positions in CMBS and non-agency MBS also had a positive impact on performance. Active duration management also contributed due to the volatile period for interest rates. Exposure to tax-free municipal bonds and select credit hedges were the largest detractor during the period. As of quarter end, the portfolio manager prefers to maintain a low risk profile in terms of both duration and credit beta due to the potential for volatility that could affect the U.S. economic recovery in 2014. The Fund has a bias to areas of the credit market that appear attractive including CMBS, ABS, and non-agency MBS. A portion of the Fund's risk budget will also be used to seek market neutral alpha in European credit and agency MBS.
Domestic Equity		
Vanguard 500 Index:Sig (VIFSSX)	Maintain	3Q 2013 - In accordance with its investment objective, the Vanguard 500 Index fund has performed in line with the S&P 500 Index.
J Hancock III:Ds Val:R6 (JDVWX)	Maintain	3Q 2013 – The John Hancock Disciplined Value Fund (sub-advised by Robeco Boston Partners) outperformed the Russell 1000 Value Index during the third quarter. Domestic equity markets continued to move higher during the quarter despite geopolitical concerns surrounding Syria and the uncertainty of a government shutdown in Washington. The portfolio's stock selection drove results during the quarter especially in the health care, industrials and energy sectors. In health care, Amgen posted strong returns after announcing earnings above expectations and releasing positive forward guidance. Energy holdings, EOG Resources and Schlumberger, also had a positive impact on relative returns. Sector positioning was also beneficial this period due to an underweight in utilities and telecom and an overweight in the consumer discretionary sector.
		The sale of Robeco Group to Orix Corporation was completed on July 1, 2013. There were no changes at Robeco Boston Partners.

Harbor Cap Apprec;Inst (HACAX)	Maintain	3Q 2013 – The Harbor Capital Appreciation Fund (sub-advised by Jernison Associates) outperformed the Russell 1000 Growth Index during the third quarter. This strong performance also landed the strategy in the top quartile of the large cap growth peer group. Superior stock selection drove relative results during the period especially in the information technology and consumer discretionary sectors. The team's focus on earnings growth finally was rewarded during the quarter as fundamentals began to come back into play and higher growth companies performed well. The Fund's internet names, such as Facebook and LinkedIn, did particularly well. Facebook's stock doubled after the outlook for mobile advertising strengthened. Other stocks that contributed during the quarter were Priceline.com, Salesforce.com and Whole Foods.
		The sale of Robeco Group , which owns Harbor, to Orix Corporation closed July 1, 2013. Orix Corporation now owns 90.01% of Robeco and Rabobank owns the remaining 9.99%.
Neuberger Genesis;Inst (NBGIX)	Maintain	3Q 2013 - The Neuberger Berman Genesis Fund outperformed the Russell 2000 Index in the third quarter. From a stock selection perspective, holdings in the financials and energy sectors added the most value. Within financials, the strong performance of a specialty mortgage service provider and mortgage support & technology service company aided the Fund. In the energy sector, the portfolio's positions in the energy equipment & services industry contributed the most to performance. Conversely, selection in healthcare detracted from returns led by several healthcare equipment & services holdings. From a sector allocation perspective, underweights in financials and utilities along with an overweight to industrials added the most value during the quarter. Within financials, having no exposure to REITs was beneficial as they produced poor results during the quarter.
International Equity		
Vanguard Intl ValInv (VTRIX)	Maintain	3Q 2013 – The Vanguard International Value Fund posted double digit gains this quarter and outpaced its benchmark. Overall, international equity markets performed well in the period as signs of economic stability in Europe benefited equities. During the period, developed market stocks outpaced emerging markets. The Fund's underweight to emerging markets helped relative results. Also contributing to results were holdings within the financial sector. Among the top contributors was Royal Bank of Scotland. Offsetting some of these strong results was an underweight allocation to the materials sector. Materials stocks rebounded this quarter on signs of economic stability out of Europe and the Fed's decision not to taper its bond buying program.
American Funds EuPc;R-6 (RERGX)	Maintain	The Fund is sub-advised by ARGA Investment Management, Lazard Asset Management, and Edinburgh Partners.
		3Q 2013 – The American Funds EuroPacific Growth Fund posted strong gains this quarter but slightly trailed the MSCI ACWI ex USA Index. It was a good quarter for equity markets across the globe. Led by strength in European equities as signs of economic stability helped stocks in the region. The Fund's results benefited from the overweight allocation to Eurozone companies. Stock selection within this segment also added to relative results. Among the top contributors to results was the German bank, Commerzbank. Despite posting solid gains, emerging market equities continued to lag developed markets for the period. Overall, stock selection within emerging markets was positive for the period while the removal of the overweight to the region neutralized the allocation impact. Among the biggest detractors to results was the cash position that averaged 5.6 percent. Also detracting from results was the underweight allocation and weak stock selection in the materials sector. It was announced that Stephen Bepler, one of the 10 portfolio counselors, will retire later this year.

Vanguard Int'l Gro Adm (VWILLX)	Maintain	3Q 2013 – The Vanguard International Growth Fund rose for the period with results that outpaced that of its benchmark. It was a good quarter for international equity markets. Leading the way higher were developed markets, benefiting from signs of economic stability out of Europe. Strong stock selection in the consumer discretionary and information technology sectors added to relative results this quarter. The information technology sector benefited from its holding of several companies in China. Among these strong performers were Baidu and Tencent Holdings. Slightly offsetting this strength was the underweight to the energy sector, which performed well this quarter. As of the end of the quarter the Fund's largest sector was the financials sector, followed by the consumer discretionary sector.
		This Fund is sub-advised by Schroder Investment Management, Baltic Gifford Overseas, and M&G Investment Management.
Inflation Protection		
Vanguard Infl-Prot Adm (VAIPX)	Maintain	3Q 2013 – The Vanguard Inflation Protected Securities Fund produced positive absolute results and performed in line with the Barclays U.S. TIPS Index during the third quarter.
PIMCO:Comm RR Str;Inst (PCRIX)	Maintain	3Q 2013 – The PIMCO Commodity Real Return Fund posted positive absolute returns in the quarter and outperformed the DJ-UBS Index. Hard asset commodities rebounded on evidence of stabilized growth expectations in Europe and China. The Fund's positive relative results were driven by use of TIPS as the primary collateral to the commodity futures contracts. The Barclays TIPS Index gained 0.7% in the quarter, as shorter maturity real yields rallied. The Fund's modified roll strategy, aimed at rolling futures contracts outside of the standard index roll period, was also modest contributor. Finally, a bias toward WTI over Brent crude was positive, as was an underweight to corn as soybeans, in expectation of strong harvests.

Statistics Definitions

Statistics	Description
Sharpe Ratio	<ul style="list-style-type: none"> - Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. - The result is the absolute rate of return per unit of risk. The higher the value, the better the product's historical risk-adjusted performance.
Alpha	<ul style="list-style-type: none"> - A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. It is a measure of the portfolio's historical performance not explained by movements of the market, or a portfolio's non-systematic return.
Beta	<ul style="list-style-type: none"> - A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of a portfolio's non-diversifiable or systematic risk.
R-Squared	<ul style="list-style-type: none"> - The percentage of a portfolio's performance explained by the behavior of the appropriate benchmark. High R-Square means a higher correlation of the portfolio's performance to the appropriate benchmark.
Treynor Ratio	<ul style="list-style-type: none"> - Similar to Sharpe ratio, but focuses on beta rather than excess risk (standard deviation). Represents the excess rate of return over the risk free rate divided by the beta. The result is the absolute rate of return per unit of risk. The higher the value, the better the product's historical risk-adjusted performance.
Tracking Error	<ul style="list-style-type: none"> - A measure of the standard deviation of a portfolio's performance relative to the performance of an appropriate market benchmark.
