

Advancing 4-H Youth Careers in Food and Agriculture via Biotechnology & STEM

New Project Funded will help youth

- Learn about biotechnology
- Explore biotechnology as a career

Our new 4-H clubs focused on agriculture, food, biotechnology, and STEM careers. Youth ages 14-18 will:

- **Join a cohort and help us build online games (participate in a design jam with New Mexico State University and provide game feedback)**
- **Visit agriculture, food, and biotechnology companies in the state (in-person field trips!)**
- **Explore careers in food, agriculture, biotechnology, and STEM**

UConn 4-H

UConn 4-H is the youth development program of Extension in UConn's College of Agriculture, Health and Natural Resources. 4-H is a community of over six million young people across the U.S. who are learning Science, Technology, Engineering and Math (STEM), leadership, citizenship and life skills through their 4-H project work.

This work is supported by the Food and Agriculture Nonformal Education program, grant no. 2022-68018-36094 from the USDA National Institute of Food and Agriculture.
